I really like this game. It provides a good challenge, and beating my previous time always feels like a good achievement. The powerups have good variety, although lately I just seem to save up for a rocket. This VR game is certainly worth the money.. Awesome game.. Great game and a work out. I like this game a lot, both solo and multiplayer. Starts off slow then quickly gets hectic in solo. Some glitches now and then but overall well made and fun.. Fun Game, with great Head 2 Head gaming possibilities! Simple and fun as the SPT game. However, it would be nice with a cleaner background when challenging other users, a bit hard to see the chaperon system when playing and moving around. Too Much flashing graphics around the play area, would be great if there was a minimal vector graphic setup for seriously online competitions, that could be selectable.
